Make your programs accessible anywhere

You can webcast annual meetings, seminars, lectures, and any type of presentation. These can be delivered with your choice of media: Live over the Internet, or over phone lines (or both), recorded, self-paced WEB courses, or distributed with CD-ROMs or DVDs.

Superior online production

Resulting from a decade of research and development, you-niversity delivers the best webcasting experience over the web today. Large and dispersed groups of attendees easily tune -in to view, interact and collaborate online.

Presenters comfortably deliver their presentations in a natural way using their computer or their phone. Everybody enjoys the savings and convenience of attending live and on-demand programs over the Internet.

A management system that puts *you* in control

Manage your account online! Create and manage your branded WEB-based Conference Center. Publicize upcoming programs, collect and monitor enrollments, upload recordings to your library, view real-time attendance reports and utilize different authentication models to control the access to your content.

Enhanced webcast recording environment

The recording process is completely transparent to the attendees. Using you-niversity's rich-archiving options, you may post links to the recordings on your web site <u>immediately</u> following the event. The enhanced rich environment offers slides animations, online notes taking, polls and surveys, bookmarking, hyperlinks and many more exciting features. Recordings are, indexed allowing attendees to review sections of interest. Programs can also be made available on CD-ROMs or DVDs to complement the online delivery.

Webcasting - Web Conferencing

Everything you need for your online programs

Only you-niversity offers the flexibility of a scalable solution addressing all your webcasting or web conferencing needs. You can launch your online program, either archived on your web site or distributed on CD-ROMs, then gradually scale up to live, interactive web courses.

Technical Specifications

To attend a You-Tools™ session, attendees' computers must meet the following minimum requirements:

• An IBM PC compatible computer (MAC computers are also compatible – please check with us)

• A 450+ MHz CPU

• 128+ MB RAM

• Sound card and speakers (or headphones)

• A resolution of 800X600 or higher

• An Internet connection with a minimum bandwidth of 45 Kbps (lower bandwidths are supported, however video quality may deteriorate)

• Operating System supported: Windows 98/2000/ME/XP/NT/95

• IE (Internet Explorer) 5.0

• Windows Media Player 9.0 or later plug-in

Firewalls: Usually there are no special considerations when attendees access the programs from home or office environments. In other environments please use You-Tools' wizard to check compliance. Reviewing recordings with CD-ROMs requires no firewall considerations.

Note: Specifications may change without notice

Simple and smart web architecture

Tuning to a webcast is a true *click-and-play* experience. You-niversity automatically detects participants' computer resources, making efficient utilization of the communication lines. Producing the event is greatly simplified using you-niversity's webcast controller tools. Optional smart proxy technology allows for bandwidth multiplication of up to 200-fold, delivering high-quality audio and video through a single Internet connection.

No special software needed

You-niversity does not require any type of proprietary software set up. Attendees and associates do not have to deal with reinstalling computer software every time upgrades are available. They simply *click-and-play*.

Unmatched customer care

An unmatched combination of customer care programs are offered by a friendly and efficient support team: End-users support (through toll-free numbers and email accounts), staff training and ongoing product support are provided by our certified technicians using the vast knowledgebase and expertise we acquired.
